EDUCATION

Hochschule Schmalkalden

Masters in Computer Science

Schmalkalden, Thuringen, Germany

ESPRIT

Computer Science Engineering specialized in Data Science

Tunis, Tunisia

Graduation Date: Sep 2024

WORK EXPERIENCE

Value - AI For Capital Markets

Internship

Tunis

Jun 2024 - Jul 2024

- Developed an automated system for Citi Bank, focusing on Alstom, to generate one-year forecast research reports on stocks, reducing report generation time to one day.
- Utilized **Google's LLM Gemini**, **Retrieval-Augmented Generation (RAG)**, and **PostgreSQL** for database management, with data science techniques to structure and clean unstructured financial data.
- System was successfully sold to a client, demonstrating its commercial viability.

Bourse de Tunis - Tunis Stock Exchange

Internship

Tunis

Jul 2023 - Aug 2023

- Gained hands-on experience in finance and technology integration, focusing on financial analytics and web development.
- Improved communication and teamwork skills through collaborative finance-focused tech projects.

Private Higher School of Engineering and Technology - ESPRIT

Internship

Tunis

Jul 2021 - Jul 2021

- Developed an object recognition system on a Raspberry Pi board, identifying and classifying objects by shape and size.

PROJECT EXPERIENCE

Intelligent Trading Agent

Project

Tunis

Jan 2024 - May 2024

- Outperformed **Tunindex** by over 20% in high-performing years and by 10% or more in weaker years. Achieved **90%+ accuracy** in predictions with a risk level of 3-4%.
- Leveraged **TensorFlow** and **Scikit-Learn** for predictive modeling, integrating advanced mathematical equations for precision.
- Deployed on **Vercel** with minimal latency and received highly positive user feedback.

Deep Learning Project - Enhanced Object Detection

Project

Tunis

Mar 2024 - May 2024

- Used **Mask R-CNN** to enhance object detection, with focus on objects such as planes, runways, and bridges.
- Successfully deployed in a live setting, achieving substantial improvements in detection accuracy.

Machine Learning Project - Anomaly Detection

Project

Tunis

Oct 2023 - Dec 2023

- Built a network anomaly detection system with **95% intrusion detection accuracy** using **Scikit-Learn**.
- Tested as a prototype to identify potential security threats and unusual network behavior.

LEADERSHIP EXPERIENCE

CERTIFICATES

NVIDIA - Building Transformer-Based Natural Language Processing Applications

SKILLS & INTERESTS

Python, Artificial Intelligence, GenAI, NLP, Machine Learning, Deep Learning, MongoDB, Big Data, SQL,
Skills: GraphQL, JavaScript, NextJS, TailwindCSS, C, C++, JAVA, R, PHP, Django, Financial Data Analysis, Stock
Market Forecasting

LANGUAGES

English - Full Professional Proficiency | French - Full Professional Proficiency | German - Elementary Proficiency
